

ITBP Public School, Dwarka
Advisory on Viral Infection

Date: - 10.08.2022

Dear Parents,

Safety, security and wellness of the students is the prime concern of the school.

2. School is taking various measures to make people aware about the highly contagious hand, foot and mouth disease (HFMD).
 - i. It is very mild illness, but parents have to be observant and keep an eye on the rashes/blisters on the hand, foot and mouth of your ward. It mainly affects the young children below the age of 10.
 - ii. Please do not send your ward to the school in case you find any symptom of the disease and isolate him/her for rest until rashes have healed completely and fever has subsided for atleast 24 hours.
 - iii. Your co-operation in this regard is highly solicited to keep the school free from all kind of illness and wellness of the other students.
