

WORKSHOP ON DISASTER MANAGEMENT

A workshop on disaster and emergency risk management was organised for students and faculty of the ITBP PUBLIC SCHOOL by the NDRF. A lecture-cum-demonstration on disaster management to focus on capacity building and community awareness programme was organised by the search and rescue team of NDRF.

The training session on strengthening national disaster response was organised to help the students understand the steps to be adopted to respond to various disaster situations. In the event, it was told that planning, coordination and high state of preparedness were the necessary steps to handle crisis successfully. The professional volunteers provided the students with proper training and education. The relevance of small precautions that can save the lives of millions in times of sudden disasters was highlighted.

To create awareness among the students about the firefighting techniques and the ways to respond swiftly in times of such emergency situation, a mock drill was carried out. An exhibition of rescue equipment was also held on the school premises and a live demonstration was given to the students, explaining its uses and utility.

The Principal, Mr Surjan Singh expressed his gratitude to NDRF TEAM for sharing their invaluable expertise with students and teachers and preparing them to deal with such exigencies effectively.
